## Our Commitment To You

Each license to Pageflex SaaS is covered by our Customer Confidence Commitment.

This commitment gives you the confidence of knowing your site is under the constant care of our IT professionals and will be up and running when your customers need it most.

## Web-to-Print Made Easy

Pageflex SaaS (software as a service) is a fast, easy and cost-effective service that enables your business to start reaping the benefits of a web-to-print site.

Included in Pageflex SaaS are the tools, technology and expertise you need to quickly and easily get your site up and running. There is no software to install and no hardware investment required. You don't need expensive IT resources for managing servers, software, backups, or disaster recovery – it's all taken care of by the experts at Pageflex.

Using Pageflex SaaS helps you take advantage of greater economies of scale as your use of the SaaS can grow as your business needs grow. Using the SaaS gives you the chance to evaluate Pageflex Storefront technology and, because there is no long term commitment, change to a license model when the time is right for you.

Most importantly, Pageflex SaaS gives you the comfort of knowing that the technical details of your site are taken care of so you can focus on what you do best – growing your business.

# Pageflex SaaS

## What is Pageflex SaaS?

Pageflex SaaS lets you create a web site utilizing many of the key features available in Pageflex Storefront, our award-winning web-to-print application.

Using Pageflex SaaS, users get access to Pageflex Storefront and the Form Filling and Data Merge modules. These modules add the value of Pageflex's powerful customization tools to your web-to-print offering, letting users customize the range of materials you make available at your site.

## The Basic Option

The Basic Option for Pageflex SaaS includes the critical features you need to quickly and easily get started:

- One production end-user site and one administration site
- One staging site you can use to demonstrate your capabilities or stage sample products
- Purchase and setup of your domain and SSL certificate
- Credentials for accessing sites
- One copy of Pageflex Studio, our design tool built specifically for variable data publishing
- Email and phone support
- Documentation and access to our Getting Started video training series

## The Quick Start Option

This program includes everything in the Basic Option, but adds the additional benefit of creation and configuration of key products for your new online catalog.

You provide the document layout, content, graphic images, and fonts and we will configure the variables, copyfitting, and flex logic – Pageflex's patented technology that lets users protect the visual design of their work while adjusting the page layout on the fly based on the amount of variable content added for each record.

We'll even configure your online forms and document previews for customization. You'll be ready to launch your site with hyper-speed using our Quick Start Option.

## Security and Peace of Mind

Included in Pageflex SaaS are key features and services that give the comfort of knowing your site will consistently be available to your customers.

The Pageflex SaaS is located at a SAS70 Type II facility in a temperature-stable environment that is fire and heat protected. Redundant power and back-up generators are always available if they are ever needed, plus the service is monitored 24/7 via automated tools that constantly monitor hardware, network, and website health.

Together, these features give you the confidence of knowing that your data and your websites are well-protected and will be available when you most need them.
